## F O R E W O R D

Last year a group of British librarians, who are especially interested in the continuous development and increasing use of our Classification, met informally with Dr. D. J. Campbell, Librarian of the Chester Beatty Research Institute of the Royal Cancer Hospital in London, and Mr. C. B. Freeman, Librarian of the Institute of Education of the University College of Hull. The purpose was to propose a committee to cooperate with the author and the publisher of the Classification to continue its development. Both Dr. Campbell and Mr. Freeman had prior correspondence with the author and the publisher, and we had all concurred in the proposal to cooperate in issuing successive pamphlets or bulletins to convey information and communicate comment and opinion. Accordingly Dr. Campbell and Mr. Freeman announced the project in the Library Association Record of June 1953, in the chapter for Correspondence. They proposed to receive and communicate information in the stated interests. They supplemented that proposal with a list of 42 libraries that were then being classified by our Classification.

Some months later a second letter was sent out to the several journals that had published their preceding proposal, and to all the librarians who were known to be classifying by the B. C. This proposed to collect and distribute additional items, notes, revisions of special subjects, outlines of expansions, and suggestions; and it proposed a committee to meet the following

April during the Conference of the University and Research section of the Library Association.

After further correspondence, a meeting was held at Chaucer House, London, the 26th of April, 1954, twelve librarians being present. Mr. C. C. Barnard was chosen Chairman. To compose the British Committee for the Bibliographic Classification four members were then elected; Mr. B. J. Ford, of the University of London, Mr. A. E. Fountaine, of the Ministry of Health, London, Mr. C. B. Freeman, of the University College of Hull, and Dr. D. J. Campbell, of the Institute of Cancer Research, Dr. Campbell to be Secretary of the Committee. This Committee would represent the relevant interests of the British librarians using the Classification. Materials submitted for publication should be addressed to the Secretary.

Meanwhile the author had gathered from several sources about a hundred additional items and corrections, many of which should be communicated as soon as would be economically feasible. Besides these a few paragraphs of advice and information would be of interest. There was enough to make a pamphlet of about twenty pages, including a revised list of the libraries known to be classifying their collections by the B. C., the number having increased to about sixty.

To the users of the Classification it is important that new, emergent, and additional subjects and terms should not merely be provided for in the schedules but should be inserted and actualized therein, and in the Index. So they should be communicated, published, and made available. This service can be rendered most economically by coöperation in finding, communicating, and compiling them, and by publishing them in successive pamphlets, or bulletins, such as the present one, rather than in needlessly frequent editions of the expensive complete volumes. When, after several years, a sufficient

accumulation is on hand, a complete new edition, we hope, may be convenient and economical.

Additions and even expansions can usually be adjusted to the schedules, but such adaptation requires adequate knowledge of the construction and the resources of the system, as well as proper knowledge of the subjects, their relations, and interests. Moreover consistency is requisite to avoid confusion in using the system. Our system admits, perhaps more conveniently than others, such alternatives and adjustments, with many references and notes; but alterations in the schedules necessitate changes in the Index, and sometimes additional notes and references.

Special expansions for specialized libraries may be of interest to other libraries in the same or closely related fields, and sometimes room for them could be found in our Bulletin, if they would fill only a page or two; or outlines of them, or descriptions, could be so published. Our second Bulletin will probably contain such matters transmitted from the British Committee.

More extensive versions and fundamental changes in the system are, however, beyond the scope of this Bulletin, except in a suggestive way for consideration. But they might, if valid, be incorporated in a subsequent edition of the complete Classification.

## NOTES AND COMMENTS

The Australian National University at the capital city, Canberra, by the action of its Council on the recommendation of its Librarian, Mr. A. L. G. McDonald, adopted about 1948 for its recently instituted Library our Bibliographic Classification, though the publication was then still incomplete. Mr. McDonald, having studied the several available classifications, found the B. C. superior in certain respects for his Library, and he had the courage of conviction in so adopting it. In his decision he was probably influenced by the published approbation of Mr. John Harris, then Librarian of the University of Otago, at Dunedin, New Zealand, who had adopted the B. C. there in 1936 and in the twelve years of experience with it had found it efficient and educative. Moreover in 1948 several important libraries in London had adopted the B. C. and had found it not only superior but efficient; and they probably had said so in reports and communications. Besides there had been several commendations in reviews. Mr. McDonald had doubtless reported this experience and commendation to the Council of his University. He also wrote to the publisher regarding the probable date of the completion of the Classification, and the likelihood of obtaining in advance copies of schedules that were needed especially.

In view of these facts the aspersions of certain editorial comment in the Australian Library Journal last year appear to be unjustified, if not captious. The resulting rejoinder in three letters that followed presented the question in a clearer light, and more judiciously. The author and the publisher of the B. C., the H. W. Wilson Company, take occasion to thank the writers of those informative and corrective expressions.

We thank Mr. D. A. Cameron-Brown, of the Polytechnic Library School in London, for showing us that in our section PW, Christian Societies, in the sub-section PWF, we had misplaced the Trappists as reformed Carthusians, whereas we should have placed them as reformed Cistercians in sub-section PWE.

TW, National Income. If the term National Income means that of the entire nation, place it in TTH, but if it means the income of a single government or nation, it should be placed under TW, with the letter for the nation added from Schedule 2, and after a comma, the proper letter from Schedule 20b, thus, for the national income of England TWe,D.

Schedule 17 (follows QB), subdivision ,N: Regulation, by legislation, supervision, inspection, or otherwise, of any industry, agency, service, or administrative office, profession, trade, etc., may either be subordinated under the special subject according to Schedule 17, from which the appropriate letter would be suffixed after a comma, or it may be subordinated to one of the captions in the latter half of RG, Administration of Government. If none of these captions fits the subject-matter (RGK-RGW), RGY is residuary for other special subjects. If the subject is for or by a particular state, nation, etc., it would be subordinated likewise under RH, applying Schedule 2 and Schedule 18, subdivision ,R, or Schedule 18a ,K - ,Y.

The Systematic and Auxiliary Schedules are listed and located in Table IV, which is placed in Vol. I-II and in Vol. III, just ahead of the detailed schedules. The auxiliary schedules are located for convenience in contiguity with the Classes to which they are respectively relevant.

Sculpture in the Arts, Class V, was classified in two sections, VE and VF. The history and biography has less than one page. So there was not room to name the historic sculptors, as the historic painters were named, and in literatures the chief poets and authors, dramatists and novelists, and in History kings, queens, presidents, and the chief statesmen. In general Schedule 1 is applicable under the respective sections and sub-sections, and so the mnemonic 4 (Schedule 1) for Biography is indicated under VEC, and is likewise applicable under the other sub-sections as the note at the head of the section advises. Yet it may prove convenient to include the chief sculptors in the Index; so they are added to the addenda in the following pages.
